Project development overview

Overview

1. CRM & Reporting Console
2. Contact Centre Solution
3. AI- Chatbot

CRM & Reporting Console

- Robust CRM
- Advanced Reporting
- Create multi-level staff accounts with granular permissions with powerful access control features

Contact Centre Solution

- Real-time call recording with encrypted files to prevent tampering.
 - Integration with ACD or PBX API for efficient recording interface.
 - Single license supporting recording on all IP Phones, including various trunk lines and internal calls.
-

Contact Centre Solution

- Advanced features like rules-based storage, call tagging, and search/replay capabilities.
 - Additional functionalities such as online/offline storage options, archival to network drives, and high availability configuration.
-

A.I Enhanced Chatbot

- Conversational capabilities for citizen support and machine learning for enhanced accuracy.
 - Logging and timestamping all bot-citizen conversations with provision for live agent escalation
-

Implementation Plan

CRM Development

A.I Chat bot
deployment

Beta testing - live
